

Imagine...

a second story deck that absolutely waterproofs your space below.

Features and Benefits:

ABSOLUTELY WATERTIGHT.
LockDry's® revolutionary patented locking seal and continuous gutter technology provides a gapless floor decking and roof covering with single layer construction — absolutely watertight underneath.

MAINTENANCE FREE.
Eliminates painting, staining and waterproofing. No splintering, cracking or warping.

COMPLETE IN-HOUSE DESIGN SERVICE.
Send us a drawing or rough sketch and we will provide a proposal and detailed CAD drawings in three views.

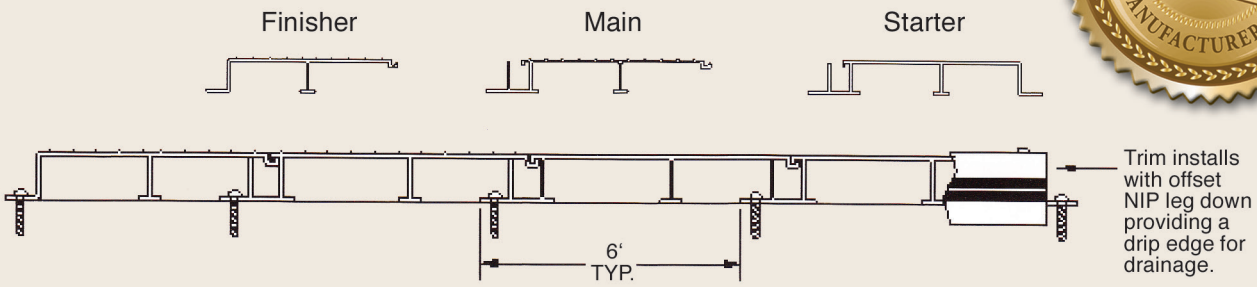

BEAUTIFUL APPEARANCE.
LockDry® is available in four standard colors with matching aluminum railings adaptable to any architectural style. Fine ribbing and a textured finish provide a non-skid surface that stays cooler to the touch than wood or concrete.

ENGINEERED STRENGTH.
Exellent load-carrying capacity tested to 240 pounds per square foot (PSF) live load.

LIFETIME WARRANTY.
Each LockDry® decking system comes with a limited lifetime warranty.

LockDry® Aluminum Decking

Designed and Patented by FSI

- Aluminum decking is the superior product in the marine industry, unlike vinyl which may become brittle and chalky, or traditional wood that will splinter, retain heat, and require constant maintenance. The structural integrity of Aluminum decking allows for a span of up to 36".
- Our exclusive LockDry® Aluminum decking is the only material in the marine industry that is currently covered by a limited lifetime warranty.
- LockDry's® revolutionary patented locking seal and continuous gutter technology provides a gapless floor decking and roof covering with single layer construction.
- This maintenance free product eliminates painting, staining and waterproofing and is stain, dirt and mar-resistant.
- Our exclusive Titan Alloy™ offers a minimum of 35,000 PSI compared to other alloys that offer only 16,000 to 24,000 PSI.
- The textured high density polyester powder coat finish is up to 3 times thicker than conventional finishes.
- LockDry's® finish meets or exceeds AAMA 2604 for Salt Spray Resistance and Outdoor Exposure testing in South Florida.
- The textured finish and fine ribbing provides a non-skid surface in wet conditions.

Colors may vary from images shown. Color and actual decking samples available upon request.
